

Swedish Space Research 4%

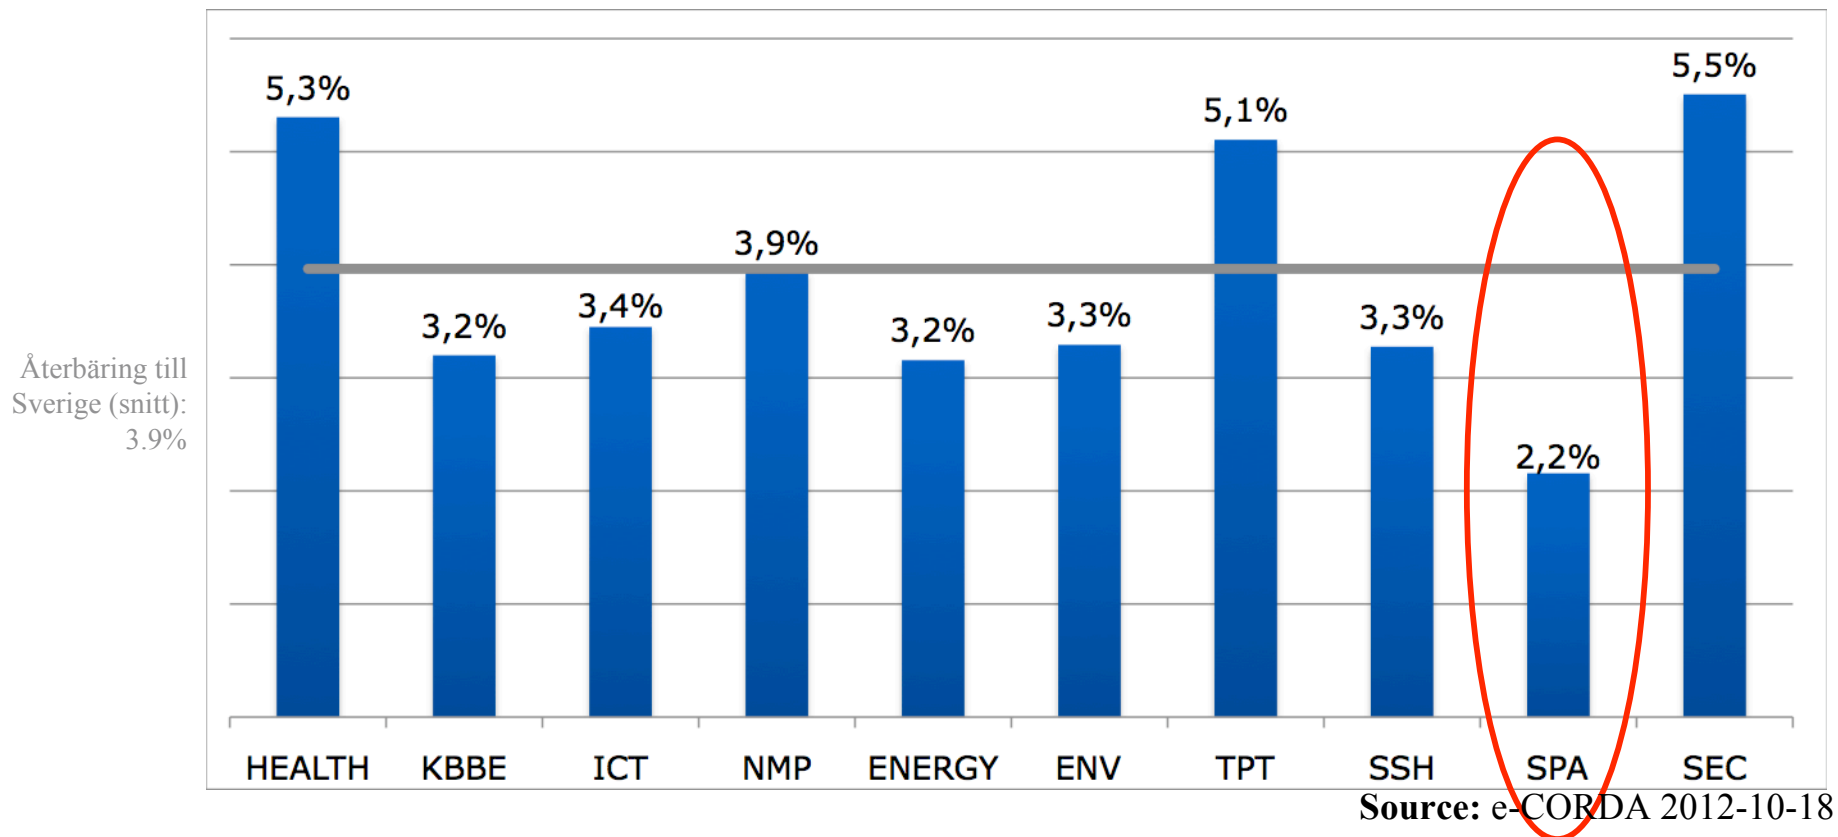

- increasing Sweden's return from Horizon 2020

Christer Fuglesang
KTH/SNSB/ESA

‘Svensk Rymdforskning 4%’

GOAL: Sweden shall get 4% of H2020 Space budget

METHOD: Coordinate at home; Influence/lobby in Brussels

In particular: Tune future Space calls to Swedish needs

'Svensk Rymdforskning 4%'

Nationella påverkansplattformar för ökat deltagande i 'Horizon 2020'

VINNOVA

- "VINNOVA-A" grant of 200 kkr for 8 months (until May 2013)

Christer Fuglesang, adjungerad professor, projektledare

Yifang Ban, professor

Göran Marklund, professor

Mark Pearce, professor

Carl-Mikael Zetterling, professor

- Include ALL Sweden's space players

- National meeting at KTH 13 Dec

Followed by telephone meetings,

email questionnaire

meeting today

Questionnaire

Some introductory questions about

Who

What done related to EU's FP before

Networks

Plans

Main question: What would you like to have written in future
H2020 calls?

Answers here vary a lot (no surprise!) and work
needed to synthesize

26 answers received to questionnaire by noon yesterday (some more still dropping in and please keep sending)

5 industry (GKN, Ruag, OHB, Cluster55, APRtec)

Academia: FOI, SMHI, SP, Försvarshögskolan, SLU, IRF, SU, LTH, LU, CTH, UU, UmU, KTH, KI

20 applied before, most succeeded (4 did not)

Most already have European networks (19)

Almost all intend to apply to H2020 (3 “maybe”, only 1 “no”)

2 answered positively to the question “had not thought about this earlier, but may now”

About the usefulness of this kind of work:

"Värdefullt" (useful) - 12

"Kan ge visst värde" (some value) - 10

"Tveksamt om kan ge resultat"

(doubtful if can provide results) - 2

"Ointressant" (of no interest) - 0

Ongoing and forward work

1. Current project

2. VINNOVA-B application

SNSB (Thorwald Larsson) is informed and coordinated with all the work / intentions and strongly support it.

This work is complementary to SNSB and both need each other!

Current project

Final goal: a meeting in Brussels with EC

Small representative delegation May/June

Timing important. "Window-of-opportunity" is
until September

Workshop at KTH 14/4 12:00 (open to all)

Email circulations to prepare WS

The formal end-of-project will be prolonged to end of July.

VINNOVA-B application – deadline 27/3 14:00

- 1000 kkr over two years
- As many "space players" as possible as co-applicants
- On-going discussion on formulating details, but the ultimate goal same as before:

More H2020 Space money to Sweden through influence/lobbying in Brussels

Outline of work in VINN-B:

- Form a small nationally representative steering group
- Hire a consultant (part time) as admin and practical help
- Pay for some other smaller services (e.g. hand-out material)
- Travel and meetings

The writing of VINN-B application a bit urgent. Drafts will circulate via email to those willing to help.

Finally: INVITATION to KTH 23 May

**KTH Rymdcenter inauguration
and a
KTH Space Day**

"Swedish Space Research 4%" and Horizon2020 influence platform work will have a dedicated session
